CreateWe

Address: A1, Bus Depot, 375, 14th Cross Rd, near Uttarahalli, 13th Main, Poornapragna Housing Society Layout, Bengaluru, Karnataka 560062

Mon - Sat 9:30 am- 6:00pm,
Sunday - CLOSED

Our Services

Firmware design
Product evaluation
Reliability analysis
Field Trials
Concept to Circuit transformation
Hardware circuit design
Thermal designs
Power utilization designs

ABOUT US

About Us

We engineer's your dream, from concept to product.

We use advanced design techniques and cutting edge tools to design products that can withstand harsh environments and varying loads. Our focus on delivering high quality circuit designs ensures that you receive a product that is both reliable and cost effective.

We design PCBs with the goal of reducing circuit size and increasing component count to improve device performance and functionality. We provide high speed data transmission, thermal management, and power reduction in our PCB designs.

Empowering Innovation

We enable and support creative ideas, technological advancements, and novel solutions.

Crafting Precision

It's the art of achieving excellence in design and execution.

Where ideas take shape

It's where imagination blossoms into innovation.

Our Services

180+
On-Time Delivery

0.00046%
Failure Rate

2,50,000+
Hours Field Usage (30 years Total usage life)

MTTF

Mean Time To Failure (Close to High Reliability, the MTTF of batteries is currently unknown)

Our Team of Experts

Thilaka P K
Production Manager

As the most senior member of the Creative Family, she brings over 18 years of experience in PCB assembly, manufacturing, and inspection. In her current role, she oversees production scheduling, materials management, inventory, and ensures adherence to operating protocols. Additionally, she handles customer warranty complaints and manages quality assurance.

Pruthi Uth
Operations Manager

16 years of experience and also responsible for all aspects of the company's technical operations including hardware and software development, testing and other assurance. He has a strong understanding of products from scratch and is dedicated to using his technical expertise to create innovative solutions for customers.

Priyanka K
Designer

New Ventures and Business Development

She is the newest member of the Creative family, with approximately one and a half years of experience in testing and customer relation management. Currently, her roles include digital marketing, company web page management, front-end customer support for concept analysis and experimentation, and graphics front-end design for projects involving GUI.

Sustainability

Committed To Keep People Healthy & Safe

We are dedicated to serving you at the time.

Robust design
Product evaluation
Reliability analysis
Field Trials
Concept to Circuit reconfiguration
Hardware circuit design
Thermal designs
Power calculation designs

SERVICES

Our Services

Quality Services

Designing

We offer ultimate design solution to meet your every need.

Prototype Evaluation

We evaluate your sample prototype and assist you to get it qualified to the required specification.

Pick and Place

Pick and Place services offers Efficiency, accuracy, Reliability, Cost-Effectiveness.

Reflow

Reflow soldering ensures uniform, flawless soldering for long-lasting component connections.

Inspection

We provide high-quality board inspections using state-of-the-art equipment.

Testing

Testing verifies that all circuits on a board work properly, from small transistors to powerful processors.
